Overview

The Root Creek Water District (District) sustainably manages surface water and groundwater resources to provide available water supply for Agricultural and Municipal customers within the District. The District imports and delivers surface water to agricultural customers and simultaneously provides potable water, stormwater and sewer services to municipal customers. The District intends to adopt a 2019 rate schedule to recover the District’s share of providing agricultural and municipal services.

The District had a Rate Study and Financial Plan completed in 2016, which was approved by the landowners in the District, to fairly determine the costs and rates for agricultural water service and municipal (Riverstone development) utility services. The costs found in Table 1. and Table 2. are the estimated costs to provide services.
